

MD Ayaan Siddiqui

Full Stack Blockchain Developer | WEB3 Project Manager

moayaan.eth@gmail.com | moayaan.eth | [LinkedIn](#) | [GitHub](#)

EDUCATION

University of Studies Guglielmo Marconi

Italy, Remote

- Master of Business Administration in Blockchain Management

Oct 2024 – Present

WORK EXPERIENCE

DIGICHAIN (Bitcoin Stablecoin Ecosystem)

Remote (The US)

Blockchain Developer

July 2024 – Present

- Developed and deployed smart contracts for LST, Trove Manager, and faucet on multiple EVM chains.
- Integrated multiple Bitcoin wallets and smart contracts into the website, ensuring seamless user experience and robust backend interactions.
- Led a team of 4, managing website development tasks.
- Wrote testing scripts in Hardhat and Foundry and coordinating project activities to achieve timely delivery.

D Frame (WEB3 Data Firm)

Remote (Netherlands)

Full Stack Blockchain Developer

December 2022 – March 2024

- Designed and built interactive front ends for two websites, integrated backend systems for three websites, and developed backend REST APIs with authentication and authorization for one.
- Worked as Technical Lead and Product Manager and managed a team of 4 interns to finish the chrome extensions, dashboards and other product requirements.
- As a product Manager, led the development and submitted the Alpha Release Product in Y Combinator

PROJECTS

LayerZero Cross Chain Swap | [GitHub](#)

April 2025

- Developed a **Cross Chain** Token Transfer Project using **Hardhat**, **Solidity**, and **LayerZero's OFT framework**.
- Wrote multiple scripts, both deployment and testing scripts along with Peer and Transfer scripts to handle cross chain transfers between **Holesky** and **Base Sepolia Testnet** and Balance scripts to check balance on both chains.

ERC 404 Contract | [GitHub](#)

March 2024

- Developed collection of 10000 **ERC404** tokens deployed on the **Sepolia** testnet. ERC404 is an innovative token standard that **combines** the best of **both ERC20 and ERC721**, creating a unique **semi-fungible token**.
- Created a **fake_USDT** Contract to pair the ERC-404 and deployed the pair on **Uniswap**.

ZkFund | [Live Link](#) | [GitHub](#)

August 2023

- A decentralized **crowdfunding platform** on **BNB Testnet**, enabling users to **launch campaigns**, secure funding, and manage withdrawals using a robust stack including 3 technologies: **React**, **Tailwind CSS**, and **Thirdweb**.
 - Integrated **Hardhat** for smart contract deployment and **Solidity** for 1 smart contract development, enhancing platform reliability.
- React Hot Toast** was utilized to improve user notifications and engagement with nearly 10 toasts used across website.

LoomLess | [Live Link](#) | [GitHub](#)

July 2025

- A **minimalist**, forever-free **screen recording extension**. No sign-up, no payment, no cloud storage. Enabling users to record their screens and instantly save the recording to local system without hassles of cloud storage or sign-ups.
- Vibe Coded** using **Claude-Code** in vanilla JavaScript, Html and CSS and **published** it live on **Chrome Web Store**.

SKILLS

- Technical Skills:** Next.js, Solidity, Hardhat, Foundry, Smart Contract Auditing, Google Cloud/AWS, TypeScript, Generative AI, Prompt Engineering, Vibe Coding, GitHub, Ethers.js, MERN Stack
- Non-Technical Skills:** Project Management, Strategic Leadership, Teamwork, Team Lead, Communication and Planning, Technical and SWAT Research

ADDITIONAL

- Language:** Conversational Proficiency in English, Native Speaker in Hindi
- Certifications and Training:** Ethereum Developer, Generative AI Foundation, Generative AI for Software Development
