

MD Ayaan Siddiqui

Full Stack Blockchain Developer | WEB3 Project Manager

moayaan.eth@gmail.com | moayaan.eth | [LinkedIn](#) | [GitHub](#)

EDUCATION

University of Studies Guglielmo Marconi

Italy, Remote

Oct 2024 – Present

- Master of Business Administration in Blockchain Management

IK Gujral Punjab Technical University

Chandigarh, India

Oct 2020 – May 2024

- Bachelor of Technology in Computer Science and Engineering

WORK EXPERIENCE

DigiChain (Bitcoin Stablecoin Ecosystem)

Remote (The US)

July 2024 – October 2025

Blockchain Developer

- **Smart Contract Development** - Led development, deployment, and testing of LST, Trove Manager, Morpho and other contracts across EVM and Non-EVM chains using foundry and hardhat with an intern.
- **Full Stack Integration** - Integrated all deployed contracts along with Bitcoin and EVM wallets across multiple networks using ethers and wagmi. Also worked on DAO functionality and documentation.

Cypherock (Hardware Crypto Wallet)

Gurgaon (India)

April 2024 – July 2024

Full Stack Web3 Developer Intern

- **Desktop Wallet Development** - Developed new features for Cypherock's Cysync wallet using Electron.js and React.js, with comprehensive end-to-end testing using Jest.
- **Product Enhancement** - Resolved user-reported bugs and collaborated with team to implement feedback-driven enhancements, significantly improving user experience.

D Frame (WEB3 Data Firm)

Remote (Netherlands)

December 2022 – March 2024

Full Stack Blockchain Developer

- **Founding Engineer & Tech Lead** - Built full-stack solutions across multiple websites, developed secure REST APIs, and led 4 interns to deliver chrome extensions and dashboards.
- **Product Leadership** - Drove Alpha Release submission to Y Combinator, hired technical talent, and executed go-to-market strategies with investors and advisors.

PROJECTS

QuickDapp NPM Package | [Live Link](#) | [GitHub](#)

August 2025

- Developed an **npm package** using **Next.js**, **Thirdweb**, **Foundry** and **Motion Animation Framework**.
- The npm package initializes a complete **Full Stack AI Powered Gassless** template with **one command** so users can focus on building their **dapps** instead of spending much time on the perfect web3 full stack setup.

LayerZero Cross Chain Swap | [GitHub](#)

April 2025

- Developed a **Cross Chain** Token Transfer Project using **Hardhat**, **Solidity**, and **LayerZero's OFT framework**.
- Wrote multiple scripts, both deployment and testing scripts along with Peer and Transfer scripts to handle cross chain transfers between **Holesky** and **Base Sepolia Testnet** and Balance scripts to check balance on both chains.

LoomLess | [Live Link](#) | [GitHub](#)

July 2025

- A **minimalist**, forever-free **screen recording extension**. No sign-up, no payment, no cloud storage. Enabling users to record their screens and instantly save the recording to local system without hassles of cloud storage or sign-ups.
- **Vibe Coded** using **Claude-Code** in vanilla JavaScript, Html and CSS and **published** it live on **Chrome Extensions**

SKILLS

- **Technical Skills:** Next.js, Solidity, Hardhat, Foundry, Smart Contract Auditing, Google Cloud/AWS, TypeScript, Generative AI, Prompt Engineering, Vibe Coding, GitHub, Ethers.js, MERN Stack
- **Non-Technical Skills:** Project Management, Strategic Leadership, Teamwork, Team Lead, Communication and Planning, Technical and SWAT Research

ADDITIONAL

- **Language:** Conversational Proficiency in English, Native Speaker in Hindi
- **Certifications and Training:** Ethereum Developer, Generative AI Foundation, Generative AI for Software Development, Foundry Fundamentals
